Abstract.....	vii
Table of Contents.....	x
List of Tables .....	xxi
List of Figures .....	xxiv
I. INTRODUCTION .....	1
A. Modeling Hit and Nursing .....	3
B. State of Informatics Research.....	5
C. Theory Guiding Research .....	9
D. Statement of the Problem.....	10
E. Purpose of the Study.....	10
F. Background to the Problem .....	11
G. Theory Development .....	14
H. Summary.....	14
II. REVIEW OF THE LITERATURE .....	16
A. Theoretical Framework: Assumptions and the Casual Format.....	16

B. Complexity and Complex Adaptive Systems (Cas) in Nursing.....	24
C. Health.....	28
D. Description of Conceptual Framework.....	30
E. Definitions and Posed Relationships .....	37
1. Nurse Workload.....	37
a. Conceptualization .....	38
b. Essential and accidental properties .....	41
c. Measure.....	41
2. Safe Patient Care Outcome .....	44
a. Conceptualization .....	47
b. Essential and accidental properties .....	48
c. Measure.....	48
3. Relationship Between Workload and Safe Patient Care Outcome.....	48
4. Turbulence .....	50
a. Conceptualization .....	54
b. Essential and accidental properties .....	60
5. Technology Structure and Nurse Adherence Protocols.....	61
6. Workarounds.....	64
a. The nature of workarounds .....	67
b. Conceptualization .....	69
c. Improvisation and intuition in workarounds.....	71
d. Workaround definitions .....	73

7.	Nurse Characteristics .....	74
8.	HIT Barrier.....	79
9.	Communication Variables .....	80
	a. Formal communication .....	81
	b. Informal communication.....	81
F.	Aims and Research Questions .....	82
1.	Specific Aim 1 .....	83
	a. Research Question 1.1 .....	83
	b. Research Question 1.2 .....	83
2.	Specific Aim 2 .....	83
	a. Research Question 2.1 .....	83
	b. Research Question 2.2 .....	83
	c. Research Question 2.3 .....	83
	d. Research Question 2.4 .....	83
3.	Specific Aim 3 .....	84
	a. Research Question 3.1 .....	84
	b. Research Question 3.2 .....	84
	c. Research Question 3.3 .....	84
4.	Specific Aim 4 .....	84
	a. Research Question 4.1 .....	84
	b. Research Question 4.2 .....	84
	c. Research Question 4.3 .....	85
	d. Research Question 4.4 .....	85

e. Research Question 4.5 .....	85
f. Research Question 4.6 .....	85
g. Research Question 4.7 .....	85
h. Research Question 4.8 .....	85
5. Specific Aim 5 .....	85
6. Specific Aim 6 .....	86
III. METHODOLOGY .....	87
A. Background.....	87
B. Statement of Purpose and Rationale .....	87
C. Methodology and Timetable .....	89
1. Custom Website Data Collection.....	89
2. Sample.....	90
3. Inclusion Criteria .....	91
4. Exclusion Criteria .....	91
5. Setting .....	91
6. Methodology .....	91
7. Participation Assessment Data Analysis.....	92
8. Description of Variables .....	92
D. Study Objectives .....	92
1. Objective 1 .....	92
2. Objective 2 .....	96
3. Objective 3 .....	96
E. Study Aims and Research Questions .....	96

1.	Assessment of Validity of Textbox Narratives .....	103
2.	Variable Definition of Attributes and Scaling of Qualitative Data .....	103
3.	Assessment of Measure Reliability and Preliminary Construct Validity Assessment.....	104
4.	Strengths and Limitations .....	105
IV.	RESULTS OF DATA ANALYSIS .....	106
A.	Description of Return Rate Characteristics.....	106
B.	Results of Data Analysis by Research Question (RQ) .....	108
1.	Research Questions 1 .....	108
a.	RQ 1.1 .....	108
b.	RQ 1.2.....	119
c.	RQ 1.3 .....	122
2.	Research Questions 2.....	122
a.	RQ 2.1 .....	122
b.	RQ 2.2.....	124
c.	RQ 2.3 .....	124
d.	RQ 2.4.....	127
i.	Formal communication .....	130
ii.	Informal communication.....	130
iii.	Problem-solving workaround.....	130
iv.	Intuitive workaround.....	130
3.	Research Questions 3.....	130
a.	Part 1. HIT barrier/problem .....	131

b.	Part 2. Workarounds .....	141
i.	Problem-solving workaround.....	143
ii.	Intuitive workaround.....	145
iii.	Formal communication .....	146
iv.	Informal communication.....	146
4.	Research Questions 4.....	147
a.	RQ 4.1 .....	147
b.	RQ 4.2.....	147
c.	RQ 4.3.....	150
d.	RQ 4.4.....	166
e.	RQ 4.5.....	166
f.	RQ 4.6.....	166
g.	RQ 4.7.....	169
h.	RQ 4.8a.....	169
i.	Chi-square.....	172
ii.	Moderation testing .....	176
1)	Moderation test #1 .....	176
2)	Moderation test #2 .....	178
3)	Moderation test #3 .....	182
4)	Moderation test #4 .....	186
5)	Moderation test #5 .....	190
i.	RQ 4.8b.....	190
iii.	Mediation effects .....	190

1)	Mediation test #1.....	194
2)	Mediation test #2.....	195
3)	Mediation test #3.....	195
4)	Mediation test #4.....	199
5)	Mediation test #5.....	199
6)	Mediation test #6.....	199
7)	Mediation test #7.....	201
8)	Mediation test #8.....	201
9)	Mediation test #9.....	201
10)	Mediation test #10.....	202
11)	Mediation test #11.....	202
4.	Research Question 5 .....	203
5.	Research Question 6 .....	213
V.	CONCLUSIONS, IMPLICATIONS, AND RECOMMENDATIONS .....	221
A.	Limitations of Findings and Interpretations.....	221
1.	Sample Integration .....	222
2.	Inside-Outside .....	222
3.	Weakness Minimization.....	222
4.	Sequential.....	223
5.	Conversion .....	223
6.	Paradigmatic Mixing.....	224
7.	Commensurability.....	226
8.	Multiple Validities .....	226

9. Political .....	227
B. Summary of the Main Findings .....	232
1. Specific Aim 1 .....	232
a. Research Questions 1.1, 1.2, & 1.3.....	232
b. Interpretation of findings .....	232
c. Methodological and theoretical findings .....	233
d. Implications for theory construction.....	234
2. Specific Aim 2 .....	234
a. Research Questions 2.1, 2.2, 2.3, & 2.4.....	234
b. Interpretation of findings .....	234
c. Methodological and theoretical findings .....	235
d. Implications for theory construction.....	235
5. Specific Aim 3 .....	235
a. Research Questions 3.1, 3.2, 3.3, & 3.4.....	236
b. Interpretation of findings: HIT barrier.....	236
c. Methodological and theoretical findings .....	239
d. Implications for theory construction.....	239
e. Interpretation of findings: Workarounds .....	240
i. Workaround definitions .....	241
1) Problem-solving workaround.....	241
2) Intuitive workaround.....	242
3) Formal communication .....	243
4) Informal communication.....	245

ii.	Revised workaround definitions .....	246
1)	Problem-solving workaround.....	246
2)	Intuitive workaround.....	246
3)	Formal communication .....	246
4)	Informal communication.....	246
f.	Methodological and theoretical findings: Workarounds.....	246
g.	Implications for theory construction.....	249
4.	Specific Aim 4 .....	252
a.	Research Questions 4.1 & 4.2.....	252
i.	Interpretation of findings .....	252
b.	Research Question 4.3 .....	252
i.	Interpretation of findings .....	253
ii.	Interpretation of findings: Feedback loop.....	259
iii.	Methodological and theoretical findings .....	265
iv.	Implications for theory construction and clinical nursing practice .....	267
c.	Research Questions 4.4 & 4.5.....	267
i.	Interpretation of findings .....	267
d.	Research Question 4.6 .....	268
i.	Interpretation of findings .....	268
ii.	Methodological and theoretical findings .....	270
iii.	Implications for theory construction and clinical nursing practice .....	271

e.	Research Question 4.7 .....	271
i.	Interpretation of findings .....	271
f.	Research Question 4.8 .....	272
i.	Interpretation of findings .....	272
ii.	Methodological and theoretical findings .....	272
iii.	Implications for theory construction and clinical nursing practice .....	273
6.	Specific Aim 5 .....	276
a.	Research Question 5 .....	276
b.	Interpretation of findings .....	276
c.	Methodological and theoretical findings .....	277
6.	Specific Aim 6 .....	279
a.	Research Question 6 .....	279
b.	Interpretation of findings .....	279
c.	Methodological and theoretical findings .....	279
d.	Theoretical implications corroboration of findings of Research Questions 5 and 6.....	281
C.	Discussion.....	284
D.	Data Analysis in a CAS .....	286
1.	Unexpected Findings .....	289
2.	Ethical Perspectives .....	290
a.	Conflict of interest .....	290
b.	Workaround motives.....	292
E.	Recommendations.....	292

F. Summary .....	293
APPENDICES	
A Nursing Informatics Literature Review .....	295
B. Turbulence Literature Review .....	301
C. Coding Scheme for Turbulence Variable .....	303
D. Pilot Study Findings.....	304
E. HITW Pilot Survey Instrument.....	333
F. Website Screen Shots.....	338
G HITW Survey Instrument .....	341
REFERENCES .....	345
VITA.....	392

## LIST OF TABLES

		Page
Table 3.1	Variable Definitions.....	93
Table 3.2	Study Aim Detail .....	98
Table 4.1	Demographic and Unit Characteristics for Nominal and Ordinal Variables .....	110
Table 4.2	Distribution Characteristics for Quantitative Measures; HIT Problem Variables .....	112
Table 4.3	Distribution Characteristics for Continuous Variables.....	115
Table 4.4	Distribution Characteristics for Quantitative Variables Associated with Turbulence .....	116
Table 4.5	Distribution Characteristics for Nurse Personality Characteristics and Nurse IT Opinions.....	117
Table 4.6	Turbulence Rotated Component Matrix .....	121
Table 4.7	Workload Characteristics.....	123
Table 4.8	Mean Level of Agreement Across Reviewer Pairs.....	125
Table 4.9	Frequency of Qualitative Workaround Themes.....	128
Table 4.10	Mean Level of Agreement Across Reviewer Pairs.....	129
Table 4.11	Examples of Comments That Were Reassigned to Definition Themes...	132
Table 4.12	Category of HIT Barrier/Problem.....	133
Table 4.13	Specific Barrier (Problem) Total Variance Explained.....	135
Table 4.14	Specific Type of Barrier Rotated Component Matrix.....	136
Table 4.15	HIT Qualitative and Quantitative HIT Problem Response Comparisons .....	140

Table 4.16	Workaround and Communication Frequency .....	142
Table 4.17	Workaround Sub Codes .....	144
Table 4.18	Relationship Between Nurse/Patient Ratio and Patient Care Hazard .....	148
Table 4.19	Relationship Between Patient Care Hazards (Safety) and Workload .....	149
Table 4.20	Cramer’s V Analysis of Contextual and Patient Safety Variables .....	151
Table 4.21	Cramer’s V Analysis of Problem/Barrier and Patient Safety Variable....	152
Table 4.22	Cramer’s V Analysis of Event Characteristics and Patient Safety Variables .....	153
Table 4.23	Pearson Correlations of Turbulence Variable .....	155
Table 4.24	Turbulence Attributes Also Identified as Problems Associated with HIT .....	157
Table 4.25	Example of Code Relations Browser Comparing Safety, Turbulence, and Workarounds .....	164
Table 4.26	Pearson Correlations of Communication Variables.....	168
Table 4.27	Nurses’ Responses to Communication and Improvement of Technology Questions .....	170
Table 4.28	Logistic Regression and Odds Ratio Calculation of Workaround Variables .....	175
Table 4.29	Moderation Test 1: Time Pressure Moderating Total Problems and Patient Hazard .....	177
Table 4.30	Model Summary: Time Pressure, Problem Total, Problem x Time Pressure .....	179
Table 4.31	Moderation Test: ANOVA: Workload Moderating Problems and Patient Hazard .....	180
Table 4.32	Hayes’ Process Moderation Model, Part 1, Part 2, Part 3.....	181
Table 4.33	Moderation Test: ANOVA: Turbulence Moderating Problems and Patient Hazard.....	184

Table 4.34	Hayes' Process Moderation Model.....	185
Table 4.35	Moderation Test: ANOVA: Nurse Experience Moderating Problems and Patient Hazard .....	188
Table 4.36	Model Summary: Nurse Experience, Problem Total, Problem x Nurse Experience .....	189
Table 4.37	Moderation Test: ANOVA: Patient Acuity Moderating Problems and Patient Hazard .....	191
Table 4.38	Hayes' Process Moderation Model Y = Hazard Scale, X = Problem Total, M = Acuity .....	192
Table 4.39	Correlations for Evaluation of Informal Communication Mediation .....	196
Table 4.40	Correlations for Evaluation of Formal Communication Mediation.....	197
Table 4.41	Correlations for Evaluation of Intuitive Workaround Mediation .....	198
Table 4.42	Correlations for Evaluation of Problem-Solving Workaround Mediation .....	200
Table 4.43	Correlations for Evaluation of Informal Communication Mediation Between Turbulence and Patient Safety .....	204
Table 4.44	Model Summary of Informal Communication Workaround Mediating Turbulence and Patient Safety.....	205
Table 4.45	Binary Matrix Example; Turbulence Workarounds and Safety .....	211
Table 5.1	Comparison of Quantitative and Qualitative Barrier Types .....	238
Table 5.2	Workaround and Efficiency Relationships .....	263

## LIST OF FIGURES

		Page
Figure 2.1	Functional Feedback Loop.....	18
Figure 2.2	Tension-Homeostasis-Structure Model (Stinchcomb, 1968).....	19
Figure 2.3	Selective Maintenance of Functional Structure .....	22
Figure 2.4	Historicist Explanation of IV Medication Documentation .....	23
Figure 2.5	Health Information Technology Workaround (HITW) Model. ....	31
Figure 2.6	Functional Form of Historicist Explanation Format (Stinchcombe, 1968, p. 106) .....	43
Figure 2.7	Malinowski’s Description of Homeostatic Balancing Loop.....	46
Figure 2.8	Health Information Technology Workaround (HITW) Model, Workload, and Safe Patient Care .....	49
Figure 2.9	Feedback Structures .....	53
Figure 2.10	Intuitive Workaround and Problem-Solving Workaround .....	65
Figure 3.1	Health Information Technology Workaround (HITW) Model, Second Iteration .....	97
Figure 4.1	Link to survey as Seen on AACN eNewslne, June 2014.....	107
Figure 4.2	HIT Problem Quantitative Responses.....	138
Figure 4.3	HIT Problem Qualitative Responses.....	139
Figure 4.4	Interaction of HIT Problems, Workload, Turbulence, and Patient Care Hazard .....	158
Figure 4.5	Workload, Turbulence, Problems, and Safety Reinforcing Feedback Loops .....	160
Figure 4.6	Workarounds, Stress, Complexity, and Efficiency Balancing Feedback Loops .....	161

Figure 4.7	Close Loop Diagram Developed From MAXQDA Code Relations Output .....	165
Figure 4.8	Interactions of Intuitive Workaround, Formal, and Informal Communication.....	174
Figure 4.9	Interaction Plot of Moderation Effect of Workload on Number of Problems and Patient Hazard.....	183
Figure 4.10	Interaction Plot of Moderation Effect of Turbulence on Number of Problems and Patient Hazard.....	187
Figure 4.11	Interaction Plot of Moderation Effect of Acuity on Number of Problems and Patient Hazard .....	193
Figure 4.12	Abbreviated HITW Model: Micro/Mezzo Level Depiction .....	206
Figure 4.13	Points of Interface Between the Micro and Mezzo Levels .....	209
Figure 4.14	Causal Loop Diagram Micro and Mezzo Levels .....	212
Figure 4.15	Abbreviated HITW Model: Mezzo/Macro Level Depiction .....	214
Figure 4.16	Points of Interface Between the Mezzo and Macro Levels .....	217
Figure 4.17	Causal Loop Diagram Mezzo and Macro Levels .....	219
Figure 5.1	Workload, Number of Problems, Turbulence, and Patient Safety.....	254
Figure 5.2	Turbulence Score x Distractions.....	256
Figure 5.3	Turbulence Score x Interruptions.....	257
Figure 5.4	Turbulence Score x Information Overload .....	258
Figure 5.5	Positive Feedback Loops .....	260
Figure 5.6	Positive Feedback Loops with Workaround Variables.....	261
Figure 5.7	Negative Feedback Loops with Workaround Variables .....	264
Figure 5.8	Mediation Model.....	274
Figure 5.9	The HITW Model and Primary Feedback Loops at the Micro-Mezzo Level .....	278

Figure 5.10 The HITW Model and Primary Feedback Loops at the Mezzo-Macro Level..... 280
